How to Use This Guide

This guide walks through one complete sample run of the GreatLife Worldwide Business Income Estimator — a free planning tool built for GreatLife distributors and their prospects. It shows exactly what a Runner enters, and exactly what the compensation plan pays back, month by month, based on those entries.

The Estimator covers all 7 categories of network marketers, from a part-time product user to a full-time heavy-hitter builder. It is designed as a recruiting and training tool — to help new team members and prospects visualize the real potential of their own GreatLife business, based entirely on their own effort. Nothing here is automatic or guaranteed; every result in this sample run flows directly from the goals and activity levels entered in Phase 1.

Purpose

To help people picture, in concrete numbers, what consistent daily effort in this business can realistically produce — and to help a sponsor guide a new distributor toward a goal that's neither too small nor too large. Ultimate goal: to help people achieve great health and wealth.

Phase 1 — Goals & Recruiting Targets

The Runner sets a monthly income goal, a target date to first hit it, and a realistic weekly activity pace. The Estimator projects forward using this pace — it does not assume anything beyond what's entered here.

Inputs for This Sample Run

Monthly Income Goal \$25,000	Target Date to First Hit This Goal 12/31/2026
Days Worked Per Week 5	Hours Worked Per Day 2
Calls / Contacts Per Day 20	New Reps Enrolled Per Day 2
Products Per Enrollment Order 3 products — 135 CV (Platinum order)	Runner's Own Monthly Autoship Auto-upgrades: 1 product → 2 at 5 personal enrolled → 3 at 9 personal enrolled

Note

The projection runs a maximum of 3 months. Coded Bonus pays to infinite depth with no generational limit, so growth compounds quickly as a team builds — capping the window at 3 months keeps the numbers meaningful and reflects where most Runners realistically hit their first goal.

Phase 2 — Leader & Team Setup

This is the realistic-mix model: a small, named group of Leaders who duplicate the Runner's own effort indefinitely, plus everyone else the Runner personally enrolls, split across three behavior groups. No spillover and no percentage-of-everyone assumptions are used — this reflects how real GreatLife teams actually get built.

Segment A — Leaders Who Follow You

A small, fixed headcount of people who duplicate the Runner's full activity pattern (days/week, reps/day, order size) and keep recruiting indefinitely — not a percentage. Real teams are usually built by 5–7 leaders like this, not a random slice of everyone.

# of Leaders 5	Leader 1 emerges Day 12
Leader 2 emerges Day 22	Leader 3 emerges Day 32
Leader 4 emerges Day 48	Leader 5 emerges Day 55

Leaders can come from anywhere in a growing downline — a downline member's own recruit, a leader another leader found, not just someone the Runner personally enrolled. This only asks when a leader emerges, not from where.

Segments B, C & D — Everyone Else Personally Enrolled

% Gold, One-Time Recruit (Segment B) 39%	% Silver, Two-Time Recruit (Segment C) 39%
% Product Users, No Recruiting (Segment D) 22%	

Segment B — orders at Gold (2 products), personally recruits 1 person one time, then stops building.

Segment C — orders at Silver (1 product), personally recruits 2 people one time, then stops building — mostly product users.

Segment D — orders at Silver (1 product) on signup, stays on 1-product autoship, never personally recruits — earns through matrix levels 1–7 via spillover placed by their upline, no sponsoring required. Still counts toward Team, Volume, Coded Bonus, and Lifestyle GPV.

Results — Monthly Goal Reached in Month 3

Goal Reached — November 2026

That month's earnings alone reached \$33,849 against a \$25,000/month goal — 54 days ahead of the target date. Modeled realistically: 5 Leaders recruit at the Runner's pace indefinitely, becoming active around day 12, 22, 32, 48, and 55 (coming from anywhere in the downline, not just the Runner's own personal list). Among everyone the Runner personally enrolls — 39% order at Gold and personally recruit 1 person one time (45% of those keep recruiting ~2/month afterward instead of stopping); 39% order at Silver and personally recruit 2 people one time (55% of those keep recruiting ~2/month afterward instead of stopping); 22% just use the products at member pricing and never personally recruit — remaining one-timers stop building, and product users stay flat.

130	1,494	158,433
PERSONAL REPS	TOTAL TEAM	TEAM VOLUME (CV)

Rank Achieved

Platinum — 130 personally enrolled, on 3-product autoship (pays through Matrix Level 14).

Earnings Breakdown — This Month

Fast Start Bonus	\$2,048
Coded Bonus	\$25,877
Matrix Pay	\$4,424
Lifestyle Bonus	\$1,500
Total Earned This Month	\$33,849

Note: The Estimator does not include Spillover, Customers, or Affiliates at the \$14.95 level. In real-world experience, top Leaders typically have 100–400 personal recruits — true heavy-hitter status well beyond this sample run.

Leadership Pipeline & Month-by-Month Progress

This section shows current qualification status toward Diamond and International Diamond, and the month-by-month breakdown of income on the way to the \$25,000 goal set in Phase 1.

Leadership Pipeline (Your Downline)

Personally-Enrolled Reps Now Platinum-Qualified: 5
5 of 12 personally-enrolled Platinums needed for Diamond
5 of 20 personally-enrolled Platinums needed for International Diamond

Month-by-Month Progress

Month	Status	Earned / Goal	Result
Month 1	Sep 2026 — Platinum, 46 personally enrolled, 2 of 12/20 Platinums	\$7,605 / \$25,000	NOT YET
Month 2	Oct 2026 — Platinum, 90 personally enrolled, 5 of 12/20 Platinums	\$19,533 / \$25,000	NOT YET
Month 3	Nov 2026 — Platinum, 130 personally enrolled, 5 of 12/20 Platinums	\$33,849 / \$25,000	GOAL REACHED

Distributor's Note

Best I have seen in my 50+ years in the industry. This tool is designed to help prospects and team members picture the potential and power of the GreatLife Worldwide compensation plan — in a class all by itself. The Estimator's Run button can be cleared and reset to zero for another run, with guidance from the sponsor or recruiter, allowing a goal to be resized if it was set too large or too small.

Disclaimer & Purpose Statement

This is a projection tool, not an income guarantee.

Each simulated month's earnings are evaluated on their own — not a running total added up across months — and checked against the goal set in Phase 1. This projection runs a maximum of 3 months. That limit is intentional: Coded Bonus pays to infinite depth with no generational limit, so its growth compounds very quickly as a team builds — a real, accurate feature of the compensation plan, not a flaw in this tool. Capping the projection at 3 months keeps the numbers meaningful and avoids projecting so far out that the math stops being a realistic reflection of early team-building activity. It's also where most Runners realistically hit their first goal.

This tool models a grounded, real-world breakdown: a small, explicitly-placed handful of Leaders that follow the Runner — personally recruiting at the Runner's pace indefinitely (real teams are usually built by a handful of leaders like this, not by everyone duplicating equally) — plus everyone else the Runner personally enrolls, split into a group who order at Gold and personally recruit once before stopping, and a group who order at Silver and personally recruit twice (or never) before stopping.

Real teams vary widely based on individual effort. This tool models only the Runner's own personal activity and the activity of their personally-enrolled downline — it does not model spillover volume from upline sponsoring efforts anywhere, including Matrix Pay, since company-wide spillover can't be predicted for an individual projection.

No income claims or guarantees are made or implied. Please refer to the official GreatLife Compensation Plan for complete details.
