How to Use This Guide

This guide walks through **two** complete sample runs of the GreatLife Worldwide Business Income Estimator — a free planning tool built for GreatLife distributors and their prospects. It shows exactly what a Runner enters, and exactly what the compensation plan pays back, week by week, based on those entries.

The Estimator models a **pure duplication** business: every person the Runner personally enrolls goes on to recruit at that same weekly pace, and everyone's autoship auto-upgrades on the same schedule as the Runner's own (1 product → 2 products at 5 personal enrolled → 3 products at 9 personal enrolled). Nothing here is automatic or guaranteed; every result in these sample runs flows directly from the goal and the weekly recruiting pace entered.

Why Two Sample Runs?

Sample Run 1 sets a modest, believable monthly goal (\$1,000) at a steady pace (3 new reps/week) — and shows how quickly even a conservative goal can be reached once a small team starts duplicating. **Sample Run 2** sets an ambitious goal (\$10,000/month) at a much slower pace (just 1 new rep/week) — and shows that the compensation plan's unlimited-depth Coded Bonus can still get a Runner there surprisingly fast, because the whole downline is compounding at that same pace, not just the Runner alone.

Purpose

To help people picture, in concrete numbers, what consistent weekly effort in this business can realistically produce — and to help a sponsor guide a new distributor toward a goal that's neither too small nor too large. Ultimate goal: to help people achieve great health and wealth.

The Five Income Streams Modeled

1. **Fast Start Bonus** — \$20/product paid to the enroller on direct-enrollment orders, paid Mon/Wed/Fri.
2. **Weekly Coded Bonus** — enrollment-triggered, unlimited depth, paid weekly.
3. **Monthly Coded Bonus** — order/reorder-triggered, unlimited depth, paid monthly.
4. **Matrix Pay** — 2x14 matrix, dual-gated by the Runner's own autoship level and personal sponsor count.
5. **Lifestyle Bonus** — GPV-tiered monthly bonus, requires Platinum rank + qualifying volume.

Not modeled: Retail Commissions, One-Time Achievement Bonuses, spillover, or the \$14.95 Affiliate tier.

Takeaway: Even a modest, believable income goal is well within reach fast once a Runner recruits consistently and their team duplicates that same pace. This is the number to point a brand-new distributor toward as a first, confidence-building milestone.

Goal Reached — Week 11 (Month 3)

That week's monthly-earnings snapshot reached **\$15,580** against a **\$10,000/month** goal.

Takeaway: Even at a slow, easy-to-sustain pace of just 1 new rep enrolled per week, GreatLife's unlimited-depth Coded Bonus and Matrix Pay compound quickly through a duplicating downline. This is real, and it has been achieved by real GreatLife distributors — it is not an exaggerated or cherry-picked result.

Leadership Pipeline — Sample Run 2

Diamond and International Diamond ranks require a pipeline of personally-enrolled distributors who themselves reach Platinum rank (9+ of their own personal recruits). This section shows where Sample Run 2's Runner stood on that pipeline at the week the \$10,000/month goal was reached.

Personally-Enrolled Reps Now Platinum-Qualified	2
Needed for Diamond (12 qualified Platinums)	2 of 12
Needed for International Diamond (20 qualified Platinums)	2 of 20

Distributor's Note

Best I have seen in my 50+ years in the industry. This tool is designed to help prospects and team members picture the potential and power of the GreatLife Worldwide compensation plan — in a class all by itself. The Estimator's Run button can be cleared and reset to zero for another run, with guidance from the sponsor or recruiter, allowing a goal to be resized if it was set too large or too small.

Disclaimer & Purpose Statement

This is a projection tool, not an income guarantee.

Each simulated week's monthly-earnings snapshot is evaluated on its own — not a running total added up across weeks or months — and checked against the goal entered. This projection runs a maximum of 6 months (a 3-month soft target, 6-month hard stop). That limit is intentional: Coded Bonus pays to infinite depth with no generational limit, so its growth compounds very quickly as a team builds — a real, accurate feature of the compensation plan, not a flaw in this tool. Capping the projection keeps the numbers meaningful and avoids projecting so far out that the math stops being a realistic reflection of early team-building activity.

This tool models a **pure duplication** business: every person the Runner personally enrolls goes on to recruit new people at that Runner's own entered weekly pace, indefinitely, and everyone's autoship auto-upgrades on the same 1→2→3 product schedule as the Runner's own. There is no manually-entered "Leaders" count and no percentage-mix of behavior groups — every enrollee is assumed to build exactly like the Runner does.

Real teams vary widely based on individual effort. This tool models only the Runner's own personal activity and the activity of their personally-enrolled downline duplicating that same activity — it does not model spillover volume from upline sponsoring efforts anywhere, including Matrix Pay, since company-wide spillover can't be predicted for an individual projection.

No income claims or guarantees are made or implied. Please refer to the official GreatLife Compensation Plan for complete details.
